Development – Gent, Oost-Vlaanderen

Department

Development

Employment Type

Fulltime

Minimum Experience

Mid-level

The ultimate goal of PieSync is to connect all major SaaS applications, and provide two-way syncing between any of them. PieSync increases the productivity of SME's worldwide by keeping their data continuously consistent between professional cloud apps.

We are hiring a Devops engineer to join our team in Ghent, Belgium. You'll be working with the platform team to make sure PieSync is always up and running and ensuring that the developer experience is as smooth as possible. We're looking for both experienced profiles or people willing to grow into this role.

What you'll be doing

- ✓ Managing fully automatic orchestration of our microservice stack in a reproducible and robust way.
- ✓ Ensuring high availability of the PieSync platform by replicating services, testing recovery scenarios and setting up monitoring and alerting rules.
- ✓ Enabling a great experience for PieSync developers by streamlining our continuous integration and deployment flow and simplifying local setup.
- ✓ Keeping our data safe from hackers, follow up on and implement the latest security standards and improve security awareness within the company.

What you'll bring to the table

- ✓ Ability to work independently and take responsibility
- ✓ Excellent communication skills
- ✓ Excellent problem solving skills, being resourceful

- ✓ Excellent understanding of distributed systems
- ✓ Experience with Linux server management
- ✓ Experience with AWS/GCP
- ✓ Experience with (or willing to learn) Docker or other container solutions
- ✓ Experience with (or willing to learn) Kubernetes/Hashicorp stack or similar solutions (Chef, Ansible, Puppet, ...)
- ✓ Familiarity with Git(hub)

What we offer

- ✓ Working on an exciting product with a top team
- ✓ Fast-moving, challenging startup environment
- ✓ All the tools you need (Laptop, big monitor, ping-pong table)
- ✓ Flexible office hours
- ✓ Working in the city centre of Ghent
- ✓ Competitive compensation package
