

# Job description

We Connect Data is looking for a **front-end web developer** to strengthen the web development team of DataScouts® (www.datascouts.eu), a Competitive Intelligence Platform that enables businesses to stay informed about market trends, challengers and the vibrancy of their network.

**Location: Gent, Belgium**

## Key Role:

- Develop the front end of an innovative software solution to help businesses stay a front runner in their market
- Create a responsive, user friendly and innovative front end for curating and visualising relevant business information.
- Develop engaging channels to put a human in the loop to solve ambiguities were needed
- Create intuitive visualisations of large scale data and analytics applying strong user experience principals.
- Engage with product management to understand the customer's challenges, prototype new ideas and propose new technologies than drive user engagement
- Design, implement, schedule, test, and deploy front end features.
- Ensure quality delivery of software through thorough testing and peer reviews.
- Extensive experience in Automated GUI Testing

## Your Profile:

- Experience with developing data heavy front-end applications using JavaScript, such as Vue.js and D3.js
- Experience with using HTML and CSS, including CSS frameworks, such as Bootstrap or Foundation
- Experience with web development using PHP and Laravel framework is an asset
- Experience with using agile software development methods
- Experience with usability analysis, testing, and client-facing engagements, including design discussions and product demonstrations
- Experience with a structured build software, including Gulp, Grunt, or NPM

## Additional skills and qualifications:

- Knowledge of JIRA, Confluence, Git, and GitLab
- Knowledge of Web development, JavaScript, JSON REST, web architecture, and HTTP specification
- Basic understanding of wide range of database systems (ElasticSearch, MySQL, NoSQL, graph databases)
- High standards with code quality ethics and meeting deadlines
- Fluency in English (spoken and written)
- Willingness to continuously learn new things
- Teamplayer

## Why you should join us?

You will be part of an ambitious fast growing tech startup. You will have the opportunity to learn all about AI, Active Learning and more.

We like to hire professionals and don't like to micro-manage so you should have the ability to manage your own work while you work as a team.

If you have an entrepreneurial spirit, get excited about finding smarter ways to do things, and have a burning desire to be part of a team where you can truly make a difference, we want to meet you.

Please send your CV including an overview of your past projects and references to [bart.frison@datascouts.eu](mailto:bart.frison@datascouts.eu).
