

# IT SYSTEM ENGINEER

READY FOR A  
**CHALLENGE?**

JOIN US IN SHAPING THE WORLD!

## YOUR RESPONSIBILITIES

As an IT System Engineer you...

- Are responsible for the design, configuration and support of our IT installations worldwide (sites, offices, ships,...)
- Provide support with focus on network, windows servers, active directory, virtualization, hardware,...
- Provide, for our vessels and due to the specific setup, support on all levels. For our remote sites and offices you operate as an escalation path for the internal helpdesk. Quick response and quality are both key in this process.
- Are able, after the necessary internal training, to give a design solution for our remote locations and ships. If necessary you follow-up the installation on site.
- Work together with the team concerning different projects, for example server infrastructure renewal, migration to cloud based solutions,...

## YOUR PROFILE

As an IT System Engineer you...

- minimum have a Bachelor degree option ICT or equivalent by experience
- have experience with virtualization, storage TCP/IP, Networking & Switching, Firewalls & Security Windows Server environments & Active Directory Powershell scripting
- are hands-on, analytical, inquisitive, result and client driven
- can set priorities and have a flexible attitude
- are a team player but can work autonomously. You can take initiative and have good communicative skills
- have a background in and a passion for IT
- are willing to travel

## OUR OFFER

As an IT System Engineer you'll have...

- an excellent remuneration package including numerous interesting advantages, such as pension and health insurance.
- a challenging position with corresponding responsibilities.
- an engaging international working environment.
- a wide range of career opportunities, personal and professional growth and the possibility to follow courses.
