JUNIOR ENGINEER – LINUX

Looking for a job where things change rapidly but without chaos? Do you want to have the ability to work with new and bleeding edge technology on a project-based fashion without running into the death by process trap? Stop looking and join Sentia's Implementations organization!

SO TELL ME, WHAT IS THIS ALL ABOUT?

- You are contributing to the lifecycle of internal and customer facing platforms together with your Operations colleagues
- You will be implementing customer-specific environments
- You will transition environments towards your Operations colleagues by transferring knowledge about the respective environment
- Together with your project management colleagues you are supporting projects
- You will be supporting migrations during execution
- You are expected to regularly decompress and maybe even play some ping pong

WHAT DO WE WANT FROM YOU?

- Knowledge of the following: o Linux-flavored OSs and its secrets o VMWare's ESX server and its associated suite of products
- Knowledge on one or more of the following frameworks, middleware and application servers running on Linux:
  - E-mail application servers (postfix, …) and its associated protocols (smtp, imap, pop, …)
  - Web application servers (Apache, nginx, …) and its associated protocols (http, https)
  - Database application servers (mysql, Oracle DB, MongoDB, Redis …)
  - Middleware application servers (tomcat, jboss, …)
- Knowledge on one of the following essential platform supporting technologies:
  - o DNS application servers (bind, pdns, …)
  - o NTP application servers
  - o Scripting languages such as php, perl, python, bash, …
- Notion about automating deployment and configuration of the above with tools such as Chef, Puppet and Ansible
- Preferably an understanding of the concepts continuous integration and continuous deployment as well as the platforms and tools used to accomplish this: o Containerization platforms (Docker, …)

- o   Orchestration platforms (OpenStack, Kubernetes, Mesos, …)
- o   OTAP/DTAP streets (Jenkins, Bamboo, …)

YOUR PERSONALITY

- You have a passion for technology and eager to learn
- You are a team player and can adapt to new situations
- You have a critical and analytical mindset
- You are a go-getter and are not afraid to pull in additional people when needed
- You are concise and result-driven
- Operating under pressure is your cup of tea
- You are flexible; if needed you jump in to help the team
- You believe creativity, motivation, integrity, and teamwork are important values

WE OFFER

- A no-nonsense, open culture where we promote new ideas and value your contribution
- A tailored career path so you can continue to grow your competences and knowledge
- Multiple teambuilding events during the year and Happy Friday @ the office
