

Junior Patent Attorney trainee (Brussels Office)

Description

We enlarge our team and open up opportunities for a Junior Patent Attorney trainee (Brussels Office) with at least a Master's degree of Applied Sciences or an Engineering degree in Chemistry or Biochemistry or preferably a PhD in Chemical Science or biochemistry.

Preferably with professional experience in industry or in an intellectual property law firm; perfect oral and written command of English and Dutch is required. A good command of French or German is expected.

We require you to possess an analytical mind, to be flexible in contact with others, to have a natural aptitude for written and oral communication including setting up comprehensive reports. You enjoy working independently.. Capability of planning, organizing and coping with deadlines as well as an eye for details are necessary requirements.

We will then be delighted to offer you a permanent full time contract with an attractive remuneration package including extra-legal advantages and the possibility to become involved in partnership on a medium term.
