

## VACANCY – (JUNIOR) RESEARCH ASSOCIATE

argenx is a clinical-stage biopharmaceutical company that is creating and developing a pipeline of differentiated antibodies therapeutics. Our unique SIMPLE Antibody™ platform combined with the complementary expertise of our people enabled us to build a clinical-stage portfolio of novel product candidates in oncology and auto-immune diseases – tailored from discovery through development to address patient needs.

We are currently looking for 1 (Junior) Research Associate to join our R&D team in our facility in Gent/Zwijnaarde. The candidate should have a high drive to generate qualitative results together and in tight collaboration with other members of the project team in a professional and challenging fashion. This all happens in a dynamic, informal and stimulating environment where you and your colleagues work to reach the set goals. Every employee gets the opportunity to get involved in all the various steps within her/his project.

### Work description

#### Responsibilities:

- Discover, characterize and optimize therapeutic antibodies
- Plan and execute experiments including interpretation and reporting of the results
- Can assist in finding solutions to any unexpected problems in a creative way
- Actively participate in project teams, organize work and understand priorities and completes assignments accordingly
- Keen to learn new techniques and to share expertise with others
- Conducting efficacy and immunogenicity assessments of pre-clinical animal studies

#### Expertise area:

- Biochemical, immunological, and cellular assays
- Assay development
- Molecular and cellular biology

### Profile:

- Degree B. Sc. or M. Sc or Industrial Engineer
- Team player, motivated, enthusiastic, accurate in execution and reporting
- Good communication skills
- Good writing skills in English
- Knowledge and hands on experience of protein related work, biochemical assays is an asset.

### Offer:

- Full time position in a collegial, dynamic and growing company.
- You will become part of a team that allows you to access a broad array of technologies with varied daily activities and to take initiatives and contribute to the success of the company.
- Competitive salary package.
